PERSONNEL / PAYROLL INTERFACE WORKAROUND

CPMS CONTROL NUMBER:	01-0011R

ISSUE DATE:	14-Sep-01	**PR/DAR NO:**	
RESCIND DATE:	29Jan2002	**REMEDY NO:**	3147

PROBLEM : **PERSONNEL** ☒ **PAYROLL** ☐

LEGACY ☐ **MODERN** ☒

BOTH ☐

Pay caps being applied to SES Adjusted Basic Pay should be capped at EX Level III. The system is erroneously capping at EX Level IV and reducing locality amounts to result in Adjusted Basic Pay at the EX Level IV value.

Severity Level 2 Bug has been logged with Oracle FED. Anticipated fix is Patch 26, due to be released 23 Sep 2001.

WORKAROUND: **PERSONNEL** ☒ **PAYROLL** ☐

Action should be completed with the erroneous locality amount to create SF-50 and payroll interface transaction. User must then produce PSEUDO SF-50 to reflect correction of the locality amount and adjusted basic pay. Using the Payroll Regeneration capbility provided to US FEDERAL HR MANAGER responsibility user must regenerate the erroneous payroll transaction. Modify the NOA field on screen 1 and NOA FIRST field on screen 2 to 002. Modify the LOC ADJ field on screen 2 to the correct locality amount after determining the amount based on EX Level III adjusted basic salary maximum. Modify SECONDARY NOA on screen 3 to reflect the NOA of the original action. Return to screen 1 of the regeneration form and exit, saving the entry.

ALL ACTIONS ACCOMPLISHED USING THIS WORKAROUND WILL HAVE TO BE HELD FOR ON-LINE CORRECTION FOLLOWING PATCH OF THE FIX.

DATE TO DFAS/CPMS:	14-Sep-01
