

**CPDSS RELEASE NOTES PATCH – August 2003
Version 1.7.4.1B**

	<i>FIXED ITEMS</i>
Instructional Program Codes (Academic Discipline)	<p>PROBLEM: The DCPDS system upgrade to 11i end dated certain instructional program codes and added new instructional codes. The addition of these new codes in the employee’s DCPDS record caused CPDSS to give credit for two education entries. This also created a duplication of the educational entries on the Referral Brief, Education Summary Report and the Experience History Maintenance Brief. FIX: CPDSS has been modified to ensure that education entries with an end-dated instructional program code are not imported during the capture of employee information from DCPDS. The Instructional Program codes in the list of values for the Job Analysis Promotion Plan templates will display the new Instructional Program codes and the cleartext definition for each. All Job Analysis Promotion Plan templates that contain an end-dated (obsolete) Instructional Program code will be promoted to an “archive” status. The “Save As” function can be used to modify the archived template with the new instructional program values. The Instructional Program code list of values that appear while using the “Save As” function will contain the old Instructional Program codes WITHOUT the cleartext description. This allows the user to easily identify the end-dated (obsolete) codes, deselect them, and select the replacement code.</p> <p>NOTE: Five obsolete Instructional Program codes were not end-dated in DCPDS during the upgrade to 11i. These instructional programs are listed below and should not be used when building job analysis promotion plan templates. A future release to DCPDS will end-date these obsolete codes. (A query of DCPDS showed only two AF employee records contain these codes.)</p> <p><i>010501 – Agricultural Supplies Retailing & Wholesaling</i> <i>390101 – Biblical & Other Theological Languages & Literatures</i> <i>390604 – Rabbinical & Talmudic Studies (M.H.L./Rav)</i> <i>390605 – Pre-Theological/Pre-Ministerial Studies</i> <i>511301 – Medical Anatomy</i></p>
Current Grade Level	<p>PROBLEM: CPDSS is importing an incorrect current grade level on some employees. FIX: CPDSS has been modified to capture the correct current assignment grade level for all employees.</p>
