AUTOWGI is not generating WGI for GM employees on Special Salary Rate pay tables. The process log for program "SUSP:WGI calls: " will reflect the following message identifying the affected records by Employee Number (not ssan): "ORA-20001: Err - LOCAL SAL LOOKUP: Person id: 11913 Assignment id: 11913".

WORKAROUND: PERSONNEL PAYROLL

Review the process log to identify the affected records to obtain the "Person_ID". Then using the procedures provided in the attached Word Document, obtain the identification of the person.

Manually accomplish the action by processing a Salary Change RPA NOA using the NOA 891 as of the appropriate WGI pay date. The creation of the RPA does accomplish correct salary calculation for completion of the WGI action.
