PROBLEM : **PERSONNEL** **PAYROLL**

Processing a separation/retirement action with NOA 825, separation incentive is flowing both transaction to DCPS without the Drawdown Action Indicator. Payroll system requires the value on the NOA 825 transaction resulting in that part of the action rejecting back to HR.

WORKAROUND: **PERSONNEL** **PAYROLL**

Payroll regeneration is needed to flow the NOA 825 action with the appropriate value in Drawdown Action Indicator. Is is very important that the regeneration be accomplished the same day as the separation/retirement action is processed when possible.
